

Product Info

The Eco-Friendly Whiteboard Marker – AusPen

The AusPen whiteboard markers were created with the purpose of keeping toxic waste out of local landfills and reducing the toxicity in our classrooms.

They are made from 100% recycled material, they use non-toxic ink, they're refillable and they are recyclable.

Reduce Your Ecological Footprint By Using AusPen Whiteboard Markers

- Made from recycled material (aluminum)
- Non-Toxic Ink (Ultra-low odour)
- Does not run out (Refillable)
- Our markers are recyclable (they don't end up in landfills)
- Very, very economical (less the cost than disposable markers)
- Extended cap-off times (still work 48 hours after cap is off)
- Durable & reversible (double tipped) 7mm nibs
- ISO 9000 certified
- Tried and tested (AusPen is currently used by thousands of educators)

**All marker pens are available with a Bullet Nib (left hand diagram) for a bolder line, or a Chisel Nib (right hand diagram) for a finer line.

**It is important to note that all the nibs are reversible, so they last twice as long and that our nibs are reinforced to prevent fraying. This provides for a longer lifespan, and retains a heavy writing line longer.

See below for product information.

AusPen Kit

- The AusPen Kit includes 6 markers and 6 refill ink bottles
- We use molded plastic for our cases so they are 100% recyclable.
- One AusPen Kit equals 246 disposable whiteboard (dry erase markers)
- Using one AusPen Kit keeps approximately 20 pounds of toxic waste out of the landfill.
- The budget savings is very attractive, as each pen costs close to 28 cents per pen.
- The Kit includes six strong colors, or any variation of these six colors (fully customizable).
