### Workshop Description:

The team from ACARA will take the group through what has changed and why in the draft curriculum review for Foundation to Year 10. We will then break into primary and secondary groups to analyse the specific content descriptors. This meeting will allow us to gain a better understanding of the changes and compare content descriptors across the year levels. Participants will have the opportunity to discuss the changes and pose questions. We recommend that both primary and secondary schools consider sending a delegate to attend this face-to-face event with the ACARA team that worked on the mathematics curriculum.
